

EMPOWER THE MIND BY USING THE BODY

StrongMIND

PROGRAM OVERVIEW

StrongMIND is a 12-week program that will take participants through 3 levels of exercise. The goal is to promote positive thinking habits by focusing on the present during mindful exercises. This program is beneficial for those who are living with PTSD, anxiety, depression, or other mental health barriers.

THE LEVELS

Level one: This level focuses on breathing and yoga. These practices are beneficial for focusing your thoughts on the present and relaxing the muscles.

Level two: This level focuses on aerobic fitness; primarily walking and cycling. This trains the mind and body on how to adapt certain bodily sensations experienced during exercise.

Level three: This level focuses on strength and cardio training. These exercises promote the release of endorphins in order to improve overall well being.

TO QUALIFY:

- Be 18 years old or older
- Receive clearance and referral from a provider to participate in physical activity and one from a mental health professional
